

## **Steve Kaplan**

Steve Kaplan is Vice-President of Data Center Virtualization for INX, a leading networking and virtualization company. Kaplan formerly ran an ROI consultancy firm and has helped organizations around the globe quantify their IT costs. He has written scores of published IT articles and white papers on virtualization, power savings and other topics, and has spoken at many venues across the globe including delivering the keynote address at Thin Power 2006 in Norway. Kaplan has co-authored several IT books including his latest USENIX book on VMware and also authored the *VirtualMan* comic book series. Kaplan has an MBA from Northwestern's Graduate School of Management and a BS from U.C. Berkeley.
