

Gilbert Mendoza
EVP / CISO
Pechanga Technology Solutions Group

Gilbert Mendoza has over 10 years experience in the IT industry, 9 of which in Gaming and Hospitality and specializing in network engineering and information security.

In 2003 he joined Pechanga Resort & Casino, where he has helped the organization through many IT infrastructure expansion projects. This includes the design and construction of Pechanga's massive High Speed Gaming Network in 2008 with over 4300 games and 9000 network clients to support the Bally slot accounting and player tracking systems.

Gilbert is an active member of the GNU/Linux and Free Open Source Software (FOSS) community and currently serves as the EVP/CISO of Pechanga Technology Solutions Group, offering professional technical services to Gaming and Hospitality organizations around the world.
