

Increase your systems' efficiency and productivity

With the Microsoft Tribal Enterprise Agreement (contract # CMS5003360)

CDW•G and Microsoft understand the unique needs of government organizations, so you know everything will be done quickly, efficiently and right the first time. Your dedicated CDW•G account manager will help you choose solutions to meet your department's needs.

With CDW•G, you get:

- A dedicated CDW•G account team that leads the industry in public sector customer service and product knowledge
- A CDWG.com extranet that gives you customized access to your account team, product information, purchase history, quotes and order status — plus the ability to track previous orders and manage asset-tagged items
- The Software License Tracker (SLT), which simplifies software-license management. Your licensing information is loaded into CDW•G's tracking system, enabling you to manage and monitor your volume software license purchases and expiration dates, and create custom license-inventory reports that are e-mailed to you. You also have the ability to input and track information about other software licenses you own
- Imaging and Restoration Services through our Configuration Center, which creates and maintains images of your organization's required software, then preconfigures new computers to include this image. This allows new computers to be plug-and-play, requiring less start-up time at your office, and the original images can quickly be restored in case of a failure, such as a virus infection, significantly reducing downtime
